Bylaws of the School Psychology Specialty Council
Approved November 18, 2010

1. Name
The name of the organization shall be the School Psychology Specialty Council hereafter referred to as the SPSC.

2. Objectives and Functions

A specialty is a substantive area of psychological practice characterized by a distinctive pattern or configuration of professional services to selected problems and populations. A specialty requires advanced knowledge and skills acquired though an organized sequence of education and training in doctoral and postdoctoral programs. The advanced knowledge and skills specific to a specialty are obtained subsequent to the acquisition of core scientific and professional foundations in psychology. A specialty is represented by the organizations that represent broadly and provide national leadership in the development and maintenance of education, training, credentialing, and practice guidelines and standards for the specialty.

The SPSC provides a process of governance through joint sovereignty, and consists of those professional groups and organizations that represent the major educational, training, and professional constituencies and stakeholders relevant to the School Psychology specialty in professional psychology.

These reports are to be based on existing CoS guidelines and guideline templates regarding such information as Education and Training, Practice, Specialty-Specific Accreditation Guidelines and Self-Study).
